PROFESSIONAL PROFILE

Full-stack developer and designer building production-ready websites, business applications, and multilingual digital experiences. Experienced across discovery, interface design, implementation, integrations, and deployment using React, Next.js, TypeScript, and backend technologies. Years of customer-facing leadership inform a practical approach: listen closely, identify the underlying problem, communicate clearly, and build tools people can actually use.

TECHNICAL SKILLS

Frontend: React, Next.js (App & Pages Router), TypeScript, JavaScript, Tailwind CSS, HTML, CSS, responsive design, Redux

Backend & data: Node.js, Express, Python, Flask, SQLAlchemy, MySQL, Firebase, REST APIs, PHP

Design & delivery: Figma, Git/GitHub, next-intl, accessibility fundamentals, component architecture, AI image generation, deployment

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer | Ionian Digital | 2026–Present

• Work directly with business owners to understand their audiences, clarify requirements, and translate operational or marketing needs into practical websites and digital experiences.

• Own the full project lifecycle—from content structure and Figma-informed visual direction through React/Next.js development, multilingual implementation, testing, revisions, and deployment.

• Create mobile-first, reusable TypeScript and Tailwind components; integrate contact workflows, motion, and brand-specific AI-generated visual assets where appropriate.

Lead Server | Vic’s, Las Vegas, NV | Jan 2023–Jul 2025

• Led daily service coordination in a high-volume environment, handled escalated guest concerns, and balanced competing priorities while maintaining clear communication across the team.

• Trained and mentored 20+ employees; recognized recurring onboarding challenges and built a React-based training application with quizzes and searchable reference material.

• Reported a 30% reduction in training time after introducing the training tool, connecting firsthand customer-service experience with software-led process improvement.

SELECTED PROJECTS

Ionian Digital — Multilingual Agency Platform | Next.js 16, TypeScript, Tailwind CSS, next-intl

• Built a responsive agency website with localized navigation, service explanations, transparent pricing tiers, five portfolio case studies, animated UI sections, and Web3Forms lead capture. Structured reusable components to simplify future content and language updates.

Vic’s Training App — Employee Onboarding Tool | React, Tailwind CSS, Netlify

• Designed and deployed a mobile-first learning resource with interactive quizzes, flavor scales, expandable reference guides, and reusable components. Turned a real workplace bottleneck into a tool designed to help new hires learn independently.

Crave Nutrition & Bistrica Paddleboard — Client Websites | Frontend Development

• Created distinct, mobile-friendly websites for a nutrition brand and tourism operator, translating business offerings into scannable page structures, clear calls to action, accessible navigation, and cohesive visual presentation.

Wine of Albania — Winery Marketplace (In Development) | Next.js, Tailwind CSS

• Developing a shared frontend architecture for a multi-winery discovery experience, with plans for producer-specific pages, educational content, and future commerce capabilities.

EDUCATION

Software Engineering Certificate — Coding Temple | Frontend & Backend Specializations
